

7.B SUPPLY & VALUE CHAIN PUZZLE PIECES TEMPLATE

Below are two examples of two different fisheries supply and value chains. In the first example export, the fishery exports its catch internationally, while in the second, the fishery supports local food security. Print and cut out these two puzzles as individual pieces. You can make your own puzzle pieces, taking inspiration from the two below. You will find blank puzzle pieces you can print and cut out on the following page. Please label your pieces according to your country and local context. Although supply and value chains include pre-harvest and post-harvest activities, the puzzle pieces cover a fish's journey from ocean, river, or lake to plate for this exercise.

SUPPLY & VALUE CHAIN - EXAMPLE 1
